PROJECTS

E-commerce Application

Nov 2024

Built a full-stack e-commerce website featuring product browsing, user authentication, and a persistent shopping cart.

- Developed the frontend using React (Vite) and implemented Redux for efficient state management across components.
 - Designed and consumed RESTful APIs using Node.js and Express.js for robust backend logic.
 - Integrated MongoDB for structured storage of user and product data.
 - Secured authentication with JWT and Bcrypt, ensuring protected sessions and access-controlled routes.
