PROJECTS

E-commerce Application

Nov 2024

Developed a full-stack e-commerce site with product browsing, secure login/register using JWT, and a persistent shopping cart.

- Developed the frontend using React (Vite); used Axios to efficiently handle API communication with the backend.
 - Designed RESTful APIs with Node.js and Express, integrated MongoDB for product and user data storage.
 - Secured user data with Bcrypt password hashing and JWT-based authentication, ensuring session protection and route access control.
